

A Drop of Ocean Water

plastic milk bottles, metal, timber, LED lights, 100 x 100 x 30cm

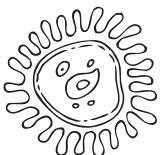

ARTSPACE at home

Art Extension:

Make more micro-organisms then create a museum display out of an old shoe box to pin your organisms up for display. Invite your family to view your exhibition or FaceTime a grandparent or older friend to show-off your display. You can tell them all about what lives in 'One Drop of Ocean Water' and how to stop plastic entering our waterways.

What you need:

Micro-organisms

Pins

Shoe Box

Instruction:

1. Make your plastic micro-organisms, at least three
2. Get a shoe box. You can paint the inside a dark colour to make your critters stand out.
3. Get a big person to help you pin the critters in the box.
